

### **REMARKS/ARGUMENTS**

The Examiner has indicated that all of the pending claims are allowable.

The Examiner has objected to claims 17 and 22 on the basis that the terms "software product" and "computer-readable medium" in those claims are not found in the specification as required by 37 CFR 1.75(d)(1). New paragraph [0007b] has been added to the specification so that there is clear support for the computer software product claims 17 and 22. Paragraph [0007b] states:

According to a further example embodiment of the invention, there is provided a computer software product having a computer-readable medium tangibly embodying computer executable instructions for converting graphic object data that defines a graphic object, the computer executable instructions comprising instructions for performing the methods described in the present application.

Support for the computer software product claims 17 and 22 and newly added paragraph [0007b] can found in original claims 17 and 18 of the application as originally filed. Accordingly, no new matter has been added by the present amendments.

The Applicant respectfully submits that the present application is in condition for allowance. Should the Examiner have any questions in connection with the Applicant's amendments or remarks, please contact the undersigned.

Respectfully Submitted,  
RESEARCH IN MOTION LIMITED

Date: October 10, 2008
